

# ABSTRACT

**Library management notification system** is a project which aims in developing a computerized system to maintain all the daily work of library .This project has many features which are generally not available in normal library management systems like facility of user login and a facility of teachers login .It also has a facility of admin login through which the admin can monitor the whole system .

It also has facility of an online notice board where teachers can student can put up information about workshops or seminars being held in our colleges or nearby colleges and librarian after proper verification from the concerned institution organizing the seminar can add it to the notice board . It has also a facility where student after logging in their accounts can see list of books issued and its issue date and return date and also the students can request the librarian to add new books by filling the book request form.The librarian after ,logging into his account ie admin account can generate various reports such as student report , issue report, teacher report and book report .

My system is about library management system with SMS notification. My website is meant for students. They browse through book by searching by [url removed, login to view] my system includes refined search. I need about 200 books in my database. E-book download will be there too. Users are admin that will be only one and addable in future. Student log in and managing account should be there. From the account they can browse books, rent books, reserve a book (whether the book has not been returned by other users, they can do early booking), and receive a notification of due dates, reminder of the returned book and collection reminder, and any additional features are welcomed. Purchasing can be there if can be done. Reminders should be sent to the students via SMS. Nice and well designed will be appreciable. I need this by end of this week. 15th of April.

Overall this project of ours is being developed to help the students as well as staff of library to maintain the library in the best way possible and also reduce the human efforts.
